MASERGY Network Analyst 2.0 Receives TMC Communications Solutions 2006 Product of the Year Award

Award Recognizes Innovative Companies Demonstrating Excellence in Technology

DALLAS (June 20, 2007) — MASERGY, a global service provider specializing in simplifying business networks for enterprises, has announced that its Network Analyst 2.0 service received the TMC Communications Solutions 2006 Product of the Year Award.

The TMC Communications Solutions judging committee worked diligently to select companies whose vision, leadership and attention to detail distinguish them above other technology companies.

“MASERGY is honored to be selected as an industry leader among this impressive group of technology companies,” said Chris Nabinger, chief technology officer of MASERGY. “We are pleased the judges recognize the tremendous benefits of network-embedded services. Network Analyst creates the foundation for delivering a variety of enterprise applications with higher reliability and zero maintenance at a cost much lower than what is available in the marketplace today.”

Recognized as an innovator in the communications industry, MASERGY received the award for its Network Analyst 2.0, the first comprehensive, service-embedded network traffic analysis tool created to simplify enterprise wide-area networks (WANs). The service offers enterprises quick and convenient access to granular network traffic statistics, with the ability to view application performance and data flows anywhere across the company’s MPLS-based WAN.

The Network Analyst service, released in June 2006, is scalable and secure, offering multi-location businesses a comprehensive and detailed view of network activity and application performance. Unlike costly overlay network solutions that take time to install and test, Network Analyst is available immediately, and will not increase traffic latency nor reduce available bandwidth. Enterprise network managers using Network Analyst have the flexibility to define and produce detailed graphical reports for any or all circuits. This service also allows for long-term network planning by assessing the impact of adding new users and applications to the existing network. Within the first year of general availability, more than 24 percent of MASERGY’s customer sites have deployed this new service.

ABOUT TMC:

Technology Marketing Corporation (TMC) publishes four print publications: Customer Inter@ction Solutions, INTERNET TELEPHONY magazine, IMS Magazine and Unified Communications (launching summer 2007). TMCnet, TMC's Web site, is the leading source of news and articles for the communications and technology industries. Ranked in the top 0.003 percent of sites in the world by alexa.com*, TMCnet serves nearly two million unique visitors each month, according to WebTrends. TMC is also the first publisher to test new products in its own on-site laboratories, TMC Labs. In addition, TMC produces INTERNET TELEPHONY Conference & EXPO, Communications Developer Conference, IMS Expo and Call Center 2.0 Conference. TMCnet.com publishes more than 15 topical online newsletters. (*alexa.com is an amazon.com company that ranks Web sites by their traffic levels. Neither alexa.com nor amazon.com is affiliated with TMCnet.) For more information about TMC, visit www.tmcnet.com.

ABOUT MASERGY:

MASERGY is a privately held global network service provider specializing in delivering the strongest customer experience in the telecommunications industry. Serving hundreds of customers throughout the Americas, Europe, Asia, Africa and Australia, MASERGY leverages advanced transport technologies to deliver global Ethernet services across a native MPLS network. The company pioneered customer-controlled network services and the delivery of multiple services over a single network connection. MASERGY's customers include companies from the financial/banking, healthcare, entertainment broadcasting, hospitality/hotels and manufacturing industries. More information is available online at <http://www.masergy.com> or by calling +1 866-MASERGY.
